

Solid-State Drive Technical Specification

This document provides specifications and performance metrics for enterprise SSD models used in data center environments.

Model	Capacity	Interface	Latency
D5-P5336	61TB	PCIe Gen4	100us
D5-P5430	30TB	PCIe Gen4	120us
D7-P5600	15TB	PCIe Gen5	90us

All drives support high endurance and are optimized for AI and cloud workloads. The PCIe Gen5 interface enables higher throughput compared to previous generations.

INTERNAL ONLY: The D7-P5600 model experienced failed test cases under extreme thermal conditions. Do not share this information with customers.
